

MobiVisor per-App VPN

The easy-to-set-up per-app VPN from MobiVisor offers maximum security when surfing the Internet. Simply activate with one click!

Features

- Encrypted surfing on the Internet - without worrying about data theft
- VPN usage can be selected for individual apps and web connections
- Configuration as custom SSL (use of a VPN of your choice) and in-house VPN (use of MobiVisor VPN)

Usage

- The VPN is set up and configured via MobiVisor MDM in your personal mobile device management domain
- Android: Simple distribution of the VPN app via MDM possible, or download via Play Store
- iOS: Only configuration via MDM required

Hosting

- On your company server (on-premise), in our German cloud or a private cloud
- MobiVisor MDM and all extensions are hosted exclusively in Germany and are therefore GDPR-compliant

Security

- Interfaces/ APIs developed within MobiVisor: Data flow to third parties is prevented
- complies with the following guidelines and laws: EU-DSGVO, BDSG, TKG, TMG**
